Publishing, Subscription and Advertising Offices: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. (*Tel:* +44 865 794141; *Fax:* +44 865 60285), and Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A. Annual Institutional Subscription Rate (1992): £815.00 (US$1480.00). Two-year Institutional Rate (1992/93): £1548.50 (US$2812.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan include despatch by air and prices are available on request. Personal subscription rate for those whose library subscribes at the regular rate available on request from Pergamon Press offices. Issued free to paid-up members of the International Society of Electrochemistry (ISE). Subscription enquiries from customers in North America should be sent to: *Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.*, and for the remainder of the world to: *Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.*

Published Monthly plus additional issues in February, June and September

VOLUME 37 (1992)

CONTENTS

NUMBER 1

	i	ISE pages
R. LARSSON	1	On the activation energy of the electrochemical reduction of O_2 on platinum
R. K. JAWORSKI and J. A. COX	5	Voltammetric investigation of a solid in the absence of a solution phase: electrochemical reduction of air-dry molybdenum oxide powders
S. DONG and B. WANG	11	Electrochemical study of isopoly- and heteropolyoxometallates film modified microelectrodes—I. Pretreatment and modification of the $Mo_8O_{26}^{4-}$ modified carbon fiber microelectrode
S. DONG, Y. XIE and G. CHENG	17	Cyclic voltammetric and spectroelectrochemical studies of copper in alkaline solution
M. G. PAVLOVIĆ, Š. KINDLOVÁ and I. ROUŠAR	23	The initiation of dendritic growth of electrodeposited copper on a rotating disc electrode with changing copper concentration and diffusion layer thickness
M. B. F. SANTOS, E. PERES DA SILVA, R. ANDRADE JR and J. A. F. DIAS	29	NiSn and porous NiZn coatings for water electrolysis
O. A. MASHKIN, N. B. SUBBOTIN and A. S. IVANOV	33	Electrochemical behaviour of copper complexes with chelate nitrogen-containing ligands in aprotic organic media
H. OKAMOTO	37	Mechanistic studies of the potential oscillation and induction period in the oxidation of formic acid on platinum
L. D. BURKE and K. J. O'DWYER	43	Multilayer oxide growth on Pt under potential cycling conditions—II. $HClO_4$ and NaOH solutions
B. V. TILAK and B. E. CONWAY	51	Analytical relations between reaction order and Tafel slope derivatives for electrocatalytic reactions involving chemisorbed intermediates
G. PISTOIA, L. LI and G. WANG	63	Direct comparison of cathode materials of interest for secondary high-rate lithium cells
C. MADORE, A. C. WEST, M. MATLOSZ and D. LANDOLT	69	Design considerations for a cylindrical Hull cell with forced convection
P. SKOŁUDA and E. DUTKIEWICZ	75	Adsorption of *p*-toluenesulphonate anions at the polycrystalline gold–solution interface
P. NIKITAS	81	Phase transitions in the multilayer model of a charged interface and the problem of negative capacities
K. MÉSZÁROS SZÉCSÉNYI and I. J. ZSIGRAI	91	*emf* studies of silver nitrate–potassium nitrate melts
Z. H. GU, T. Z. FAHIDY and J. P. CHOPART	97	A time-series approach to the oscillatory electrodissolution of copper
M. D. PRITZKER and T. Z. FAHIDY	103	Morphological stability of a planar metal electrode during potentiostatic electrodeposition and electrodissolution
A. A. ISSE, A. GENNARO and E. VIANELLO	113	A study of the electrochemical reduction mechanism of Ni(salophen) in DMF
M. MORITA, S. AOKI and Y. MATSUDA	119	*ac* impedance behaviour of lithium electrode in organic electrolyte solutions containing additives
G. PATERMARAKIS and P. KERASSOVITOU	125	Study on the mechanism of oxide hydration and oxide pore closure during hydrothermal treatment of porous anodic Al_2O_3 films
K. M. DICKINSON, K. E. HANSON and R. A. FREDLEIN	139	Potentials of zero charge and capacitance minima of polycrystalline gold in sodium fluoride solutions

B. F. Giannetti, P. T. A. Sumodjo, T. Rabockai, A. M. Souza and J. Barboza — 143 Electrochemical dissolution and passivation of tin in citric acid solution using electron microscopy techniques

A. Essalim et D. Serve — 149 Etude électrochimique et spectrophotométrique des complexes d'inclusion du diazino-2,2′ bis(éthyl-3 sulfonate-6 benzothiazole) avec les cyclodextrines en milieu aqueux

R. J. Forster and J. G. Vos — 159 Homogeneous and heterogeneous charge transfer dynamics of $[Os(bipy)_2(PVP)_n Cl]Cl$ films in neutral pH electrolytes

K. Lian, S. J. Thorpe and D. W. Kirk — 169 The electrocatalytic activity of amorphous and crystalline Ni–Co alloys on the oxygen evolution reaction

J. P. Diard, B. Le Gorrec, C. Montella and C. Montero-Ocampo — 177 Second order electrochemical impedances and electrical resonance phenomenon

Book Reviews

D. M. Kolb — 181 *Reactions at the Liquid–Solid Interface*. Edited by R. G. Compton

J. O'M. Bockris — 181 *Electron Tunnelling in Chemistry*. By R. F. Khairutdinov, K. I. Zamarev and V. P. Zhdanov

183 Electrochemical Calendar

NUMBER 2

i ISE pages

A. Widelöv and R. Larsson — 187 ESCA and electrochemical studies on pyrolysed iron and cobalt tetraphenylporphyrins

Y. Yamamoto, K. Fumino, T. Ueda and M. Nambu — 199 A potentiodynamic study of the lead electrode in sulphuric acid solution

M. A. Santos and M. L. Simões Gonçalves — 205 Electrochemistry of iron(III) tris-hydroxamate complexes: kinetic and thermodynamic studies

W. F. Lin, Z. Q. Tian, S. G. Sun and Z. W. Tian — 211 Quantum chemistry studies on electronic properties of CN^- adsorbed on silver electrodes

E. Brillas, J. Esteve, G. Sardin, J. Casado, X. Domènech and J. A. Sánchez-Cabeza — 215 Product analysis from D_2O electrolysis with Pd and Ti cathodes

M. W. Verbrugge and R. F. Hill — 221 Measurement of ionic concentration profiles in membranes during transport

A. Sabela, V. Mareček, Z. Samec and R. Fuoco — 231 Standard Gibbs energies of transfer of univalent ions from water to 1,2-dichloroethane

H. Wendt, K. Reuhl and V. Schwarz — 237 Cathodic deposition of refractory intermetallic compounds from FLINAK-melts—I. Voltammetric investigation of Ti, Zr, B, TiB_2 and ZrB_2

G. W. Walter, D. N. Nguyen and M. A. D. Madurasinghe — 245 Impedance analysis method for painted and unpainted metals

V. I. Taranenko, I. V. Zarutskii, V. I. Shapoval, M. Makyta and K. Matiašovský — 263 Mechanism of the cathode process in the electrochemical synthesis of TiB_2 in molten salts—II. Chloride–fluoride electrolytes

N. Papageorgiou and M. Skyllas-Kazacos — 269 A study of the hydrogen evolution reaction on lead bismuth alloys in sulphuric acid solutions

V. Glezer, J. Stradins, B. Turovska, D. Gustina, E. Markava and J. Freimanis — 277 Electrochemical reduction of *N*-aryl- and *N*-arylsulphonylbenzoquinoneimines in acetonitrile—III. Electrochemical model of the mechanism of interaction of quinoneimines with Hantzsch ester

E. M. Patrito, R. M. Torresi, E. P. M. Leiva and V. A. Macagno — 281 Electrochemical behaviour of passive zirconium alloys

S. Preusser, M. Herlem, A. Etcheberry and J. Jaume — 289 The photodissolution of InP

T. F. Otero and C. Santamaría — 297 Kinetics of the polypyrrole electrogeneration from aqueous solution. An *ex situ* microgravimetric study

B. Ba, H. Cachet, B. Fotouhi and O. Gorochov — 309 Surface evolution of n-GaAs in contact with acetonitrile solutions studied by electrochemical impedance spectroscopy

B. Yang, N. G. Smart and J. O'M. Bockris — 317 Ellipsometric investigation of the adsorption of acetylenic alcohols on iron

S.-I. Pyun and M.-H. Hong — 327 A model describing the growth kinetics of passivating oxide film prepared under potentiostatic conditions

F. Alavyoon — 333 Unsteady natural convection and mass transfer in copper electrolysis with a supporting electrolyte

Guo Zhi-Fu, F. Yamaguchi, A. Itoh, A. Kitani and K. Sasaki — 345 Hydroxylation of aromatic ring in corroding metal systems

I. Ziogas, M.-C. Abraham and M. Abraham — 349 Electrical conductance and viscosity of solutions of water in a ternary nitrate melt containing cadmium ions at high concentration

Y. Kunugi, T. Nonaka, Y.-B. Chong and N. Watanabe — 353 Electroorganic reactions on organic electrodes—part 15: electrolysis using composite-plated electrodes—part IV. Polarization study on a hydrophobic Ni/PTFE composite-plated nickel electrode

M. W. Hsiao, R. R. Adzic and E. B. Yeager — 357 The effects of adsorbed anions on the oxidation of D-glucose on gold single crystal electrodes

Short Communications

A. M. Polcaro, M. S. Dernini and S. Palmas — 365 Electrodeposition of catalysts for hydrogenation of organic molecules: hydrogenation of benzaldehyde

H. Tsutsumi, Y. Nakagawa, K. Miyazaki, M. Morita and Y. Matsuda — 369 Single polymer gel film electrochromic device

L. J. Bjelica and L. S. Jovanović — 371 Activation of glassy carbon electrode in aqueous and non-aqueous media

373 Corrigendum

375 Electrochemical Calender

NUMBER 3

i ISE pages

H. Stegemann, A. Rohde, A. Reiche, A. Schnittke and H. Füllbier — 379 Room temperature molten polyiodides

F. C. Nart and T. Iwasita — 385 On the adsorption of $H_2PO_4^-$ and H_3PO_4 on platinum: an *in situ* FT-*ir* study

F. Li and W. J. Albery — 393 A novel mechanism of electrochemical deposition of conducting polymers: two-dimensional layer-by-layer nucleation and growth observed for poly(thiophene-3-acetic acid)

A. Szucs, G. D. Hitchens and J. O'M. Bockris — 403 Ellipsometry of cytochrome *c* on gold surfaces: effect of 4,4′-dipyridyl disulfide

A. Lewandowski and I. Dajksler — 413 Ionic solvation—part 8. Silver(I) solvation and stability of its complex with cryptand 222 in aprotic mixed solvents

S. Panero, P. Prosperi and B. Scrosati — 419 Properties of electrochemically synthesized polymer electrodes—IX. The effect of surfactants on polypyrrole films

S. Cai, D. Jiang, J. Zhang, R. Tong, S. Jin and A. Fujishima — 425 Semiconductive properties and photoelectrochemistry of iron oxide electrodes—IX. Photoresponses of sintered Zn-doped oxide electrode

C. Barbero, M. C. Miras and R. Kötz — 429 Electrochemical mass transport studied by probe beam deflection: potential step experiments

I. Zouari and F. Lapicque — 439 An electrochemical study of zinc deposition in a sulfate medium

H. Scholl, B. Hofman and A. Rauscher — 447 Anodic polarization of cemented carbides of the type [(WC,M); M = Fe, Ni or Co] in sulphuric acid solution

K. Yahikozawa, K. Nishimura, M. Kumazawa, N. Tateishi, Y. Takasu, K. Yasuda and Y. Matsuda — 453 Electrocatalytic properties of ultrafine gold particles supported onto glassy carbon substrates toward formaldehyde oxidation in alkaline media

N. Anastasijević, Z. M. Dimitrijević and R. R. Adžić — 457 Oxygen reduction on a modified ruthenium electrode

K. Kobayakawa, A. Teranishi, T. Tsurumaki, Y. Sato and A. Fujishima — 465 Photocatalytic activity of $CuInS_2$ and $CuIn_5S_8$

A. A. Kamnev, B. B. Ezhov, V. Rusanov and V. Angelov — 469 Mössbauer spectroscopic study of ferric hydroxo complexes adsorbed at nickel hydroxides from strongly alkaline electrolytes

K. Takahashi, J. A. Bardwell, B. MacDougall and M. J. Graham — 477 Mechanism of anodic dissolution and passivation of iron—I. Behavior in neutral acetate buffer solutions

K. Takahashi, J. A. Bardwell, B. MacDougall and M. J. Graham — 489 Mechanism of anodic dissolution and passivation of iron—II. Comparison of the behavior in neutral benzoate and acetate buffer solutions

Y. Guo — 495 The kinetics of the reduction processes of PbO film on Pb in H_2SO_4—II. Linear sweep voltammetry (*lsv*)

V. Plichon and S. Besbes — 501 Electrochemical investigations of K^+-free Prussian blue films

F. A. Adekola, C. Colin and D. Bauer — 507 A study of the electrochemical behaviour of some platinum compounds at a carbon paste electrode with electrolytic binder

M. F. Mendes Viegas, E. M. Geniès, M. Fouletier and E. Vieil — 513 Polypyrrole electropolymerization mediated by *N*-methylphenothiazine: mechanism and immobilization/release kinetics study

A. S. Aricò, V. Alderucci, V. Antonucci, S. Ferrara, V. Recupero, N. Giordano and K. Kinoshita — 523 *ac* impedance spectroscopy of porous gas diffusion electrode in sulphuric acid

K. M. Abraham, M. Alamgir, E. B. Willstaedt and W. P. Kilroy — 531 Metal phthalocyanine-catalysed $Li/SOCl_2$ cells

E. Chassaing and R. Wiart — 545 Electrocrystallization mechanism of Zn–Ni alloys in chloride electrolytes

T. Sata — 555 Properties of ion exchange membranes combined with conducting polymers anisotropically—I. *emf* generation by redox reactions across composite membrane

Z. Borkowska, M. Cappadonia and U. Stimming — 565 Interfacial and bulk electrolyte properties in frozen electrolyte studies

569 Papers in Press

571 Electrochemical Calendar

NUMBER 4

i ISE pages

D. Pletcher and J. C. P. White — 575 Studies of indirect electrochemical reductions using chromium complexes with polyaminocarboxylate ligands as mediators

L. D. Burke and J. F. O'Sullivan — 585 A study of the electrocatalytic behaviour of gold in base using *ac* voltammetry

J. Zhou and E. Wang — 595 Catalytic reduction of hemoglobin at thionine chemically modified electrode and FIA applications

J. Vondrák, J. Bludská and I. Jakubec — 603 Sodium insertion in manganese dioxide electrodes

A. A. Kamnev and B. B. Ezhov — 607 Electrocatalysis of anodic oxygen evolution at the nickel hydroxide electrode by ferric hydroxo species in alkaline electrolytes

P. N. Ross and A T. D'Agostino — 615 The effect of surface reconstruction on the capacitance of Au(100) surfaces

A. M. Romulus and A. Savall — 625 Electrochemical reduction of ethyl-2-picolinate on lead in a sulfuric acid medium

C.-C. Lai and Y. Ku — 631 Effect of chelate formation on the kinetics of cadmium electrodeposition in citrate solution

M. D. Levi and E. Yu. Pisarevskaya — 635 Cyclic and steady-state voltammetric studies of the mechanism and kinetics of some solute inorganic redox-species reactions at a gold electrode covered with poly-*o*-phenylenediamine

Q.-Z. Chen, K. Iwamoto and M. Senō — 643 Transfer of alkali metal ions across the water–nitrobenzene interface facilitated by poly(oxyethylene)dodecyl ethers

G. Inzelt and J. Bácskai — 647 Electrochemical quartz crystal microbalance study of the swelling of poly(vinylferrocene) films

M. M. Laz, R. M. Souto, S. González, R. C. Salvarezza and A. J. Arvia — 655 The formation of anodic layers on annealed copper surfaces in phosphate-containing solutions at different pH

Y. Duhirel, B. Beden, J.-M. Léger et C. Lamy — 665 Passivation du cadmium en milieu basique: étude mecanistique par voltammétrie cyclique

X. Cai and M. Schell — 673 Observation of bistability in cyclic voltammetric experiments on ethanol, propanol, butanol and formic acid/formate

A. Eklund and R. I. Karlsson — 681 Free convection and stratification of electrolyte in the lead–acid cell without/with a separator during cycling

A. Eklund, F. Alavyoon and R. I. Karlsson — 695 Theoretical and experimental studies of free convection and stratification of electrolyte in a copper refining cell—II. Influence of the supporting electrolyte

A. J. Calandra, C. M. Ferro and J. Thonstad — 705 A chronopotentiometric study of fluoride ion discharge on various carbon materials

A. J. Calandra, J. R. Zavatti and J. Thonstad — 711 The effect of gas bubbles on the onset of the anode effect during fluoride ion discharge on carbon

J. Bagg — 719 Computer calculation of liquid-junction potentials—III. Temperature-dependence of junction potentials

B. Dakova, Ph. Carbonnelle, A. Walcarius, L. Lamberts and M. Evers — 725 Electrochemical study of dibenzo(*c*,*e*)-1,2-dithiin in acetonitrile medium

U. Schily and J. Heitbaum — 731 Surface analysis of freshly cut Li samples: Na-segregation and film forming reaction by O_2, SO_2, and liquid $LiAlCl_4 \cdot 3(SO_2)$

S. A. Bagshaw and G. A. Wright — 739 Monolayer deposition of lead bromide on the lead anode: kinetics and energetics

A. Survila and V. Uksienė — 745 Electroreduction kinetics of Cu(II)–glycine complexes in aqueous solution

R. Tabaković, E. Gunić, I. Tabaković and M. Zupan — 751 Electrochemical synthesis of new polymeric reagents

Short Communications

C. Iwakura, N. Furukawa and M. Tanaka — 757 Electrochemical preparation and characterization of $Ni/(Ni + RuO_2)$ composite coatings as an active cathode for hydrogen evolution

C.-P. Maschmeier and H. Baltruschat — 759 DEMS measurements of anodic and cathodic decomposition reactions of electrolytes containing dimethylamine as constituent

W. SEELIGER and A. HAMNETT 763 Novel electrocatalysts for oxygen reduction

Book Reviews

K. JÜTTNER 767 *Electrochemical Reaction Engineering*. Edited by K. SCOTT

J. KORYTA 767 *Bioelectrochemistry III: Charge Separation Across Biomembranes*. Edited by G. MILAZZO and M. BLANK

SPECIAL ISSUE

SEMICONDUCTOR ELECTROCHEMISTRY

GUEST EDITOR: L. M. PETER

i ISE pages

L. M. PETER 779 Editorial

P. ALLONGUE, S. BLONKOWSKI and E. SOUTEYRAND 781 Experimental investigation of charge transfer at the semiconductor/electrolyte junction

D. MEISSNER and R. MEMMING 799 Analysis of current–potential characteristics at n- and p-type semiconductor electrodes

H. H. GOOSSENS and W. P. GOMES 811 (Photo)electrochemistry: a suitable tool for investigating wet etching processes on III–V semiconductors

H. GERISCHER and N. SORG 827 Chemical dissolution of zinc oxide crystals in aqueous electrolytes—an analysis of the kinetics

D. VANMAEKELBERGH and F. CARDON 837 Recombination in semiconductor electrodes: investigation by the electrical impedance method

H. J. LEWERENZ 847 Anodic oxides on silicon

J.-N. CHAZALVIEL 865 Ionic processes through the interfacial oxide in the anodic dissolution of silicon

C. LEVY-CLEMENT, A. LAGOUBI, R. TENNE and M. NEUMANN-SPALLART 877 Photoelectrochemical etching of silicon

D. J. BLACKWOOD, A. BORAZIO, R. GREEF, L. M. PETER and J. STUMPER 889 Electrochemical and optical studies of silicon dissolution in ammonium fluoride solutions

Y. NAKATO and H. TSUBOMURA 897 Silicon photoelectrodes modified with ultrafine metal islands

J. J. KELLY, B. P. MINKS, N. A. M. VERHAEGH, J. STUMPER and L. M. PETER 909 Photocurrent multiplication at p-type semiconductor electrodes

G. SCHLICHTHÖRL and H. TRIBUTSCH 919 Microwave photoelectrochemistry

R. PEAT, A. R. KUCERNAK and D. E. WILLIAMS 933 Photoelectrochemical imaging of sub-monolayer lead deposits on n-GaAs

B. A. PARKINSON and M. T. SPITLER 943 Recent advances in high quantum yield dye sensitization of semiconductor electrodes

A. HAMNETT, J. GILMAN and R. A. BATCHELOR 949 Theory of electroreflectance and photoreflectance of semiconductors

P. SALVADOR 957 Dynamic electrolyte electroreflectance measurements for the *in situ* detection of flatband potential shifts

A. Sakharova, L. Nyikos and Y. Pleskov — 973 Adsorption and partial charge transfer at diamond electrodes—I. Phenomenology: an impedance study

979 Papers in Press

983 Electrochemical Calendar

NUMBER 6

i ISE pages

987 List of Review Articles

Review Article
T. Osaka — 989 Electrochemical aspects of advanced electronic materials

Papers
K. Micka and L. Kavan — 997 Electrochemical impedance of a polymer-coated electrode with circular delamination around a defect site

Z. Li and S. Dong — 1003 Interpretation of the photoreduction current response on polyaniline modified electrode

J. R. Macdonald — 1007 Impedance/admittance response of a binary electrolyte

E. M. Geniès, M. Marchesiello and G. Bidan — 1015 Preparation and properties of polypyrrole made in the presence of biological buffers

R. D. Armstrong and M. L. Marcos — 1021 Equilibrium potentials at the polymer–water interface

Y. Takasu, K. Tsukada, K. Nishimura, T. Hiromine and K. Yahikozawa — 1029 An application of the thermal desorption method to the surface characterization of RuO_2–IrO_2 and RuO_2–TiO_2 coated titanium electrodes

F. Decker, S. Passerini, R. Pileggi and B. Scrosati — 1033 The electrochromic process in non-stoichiometric nickel oxide thin film electrodes

N. Kumagai, S. Tanifuji, T. Fujiwara and K. Tanno — 1039 Preparation and electrochemical characteristics of new MnO_2–V_2O_5 systems as positive materials for rechargeable lithium batteries

M. Pagitsas, A. Karantonis and D. Sazou — 1047 Application of periodic forcing on the simplified Franck–FitzHugh model for the electrochemical oscillations observed during the electrodissolution of iron in sulphuric acid solutions

R. Moy and F.-P. Emmenegger — 1061 Co-solvents for chloroaluminate electrolytes

J. Banaś, B. Mazurkiewicz and B. Stypuła — 1069 Passivity of metals in concentrated and anhydrous solutions of sulphuric acid

Q. Pei and R. Qian — 1075 Electrode potentials of electronically conducting polymer polypyrrole

M. C. Arévalo, C. Gomis-Bas, E. Pastor, S. González and A. J. Arvia — 1083 Multiple adsorbate interactions between reduced CO_2 adsorbates and either allyl alcohol or propargyl alcohol residues on platinum in 0.5 M sulphuric acid

M. Morita, K. Komaguchi, H. Tsutsumi and Y. Matsuda — 1093 Electrosynthesis of poly(*p*-phenylene) films and their application to the electrodes of rechargeable batteries

S. Cai, J. Zhang, T. Lu, Y. Lin and Q. Yin — 1101 Intermittent light–*ac* electricity conversion on iron oxide/electrolyte solution/platinum photoelectrochemical cell

S. Piazza, C. Sunseri and F. Di Quarto — 1105 Comments on the paper by J. F. Julião *et al.* on "Anodic niobium pentoxide films: growth and thickness determination by *in situ* opto-electrochemical measurements"

J. F. Julião — 1107 Reply to comment by Piazza *et al.*

W. Kutner — 1109 Volta-potential and electrochemical quartz crystal microbalance studies of the ion-exchange membrane properties of the (α-cyclodextrin polymer film)/(4-nitrophenol/4-nitrophenolate) inclusion system

F. E. Varela, L. M. Gassa and J. R. Vilche — 1119 Kinetics and mechanism of the electroreduction of anodic layers formed on lead in 5 M H_2SO_4 at 25°C

M. Sánchez Maestre, E. Muñoz, J. L. Avila and L. Camacho — 1129 Application of Matsuda's pulse polarography theory to electrode processes coupled to very fast chemical reactions: study of the CE mechanism by differential pulse polarography

K. Otsuka and K. Furuya — 1135 Regioselective oxidation of n-hexane and aromatics in the presence of cyclodextrins during H_2–O_2 fuel cell reactions

Short Communications

R. T. Patil, N. B. Patil, A. P. Kashid and S. H. Chavan — 1143 Effect of neodymium oxide doping on solid state battery formation in potassium vanadate

J. M. Rodríguez Mellado and R. Marín Galvín — 1147 A note on the mechanism of electroreduction of isoniazid in acidic media

P. Pasquier and G. S. Picard — 1149 Pit-mapping procedure for obtaining charge transfer kinetic parameters from steady state current–potential curves

Book Review

K. Scott — 1153 *Electrochemical Engineering Principles*. By G. Prentice

1155 Erratum

1157 Papers in Press

1161 Electrochemical Calendar

NUMBER 7

i ISE pages

A. M. Espinosa, M. L. Tascón, M. D. Vázquez and P. Sánchez Batanero — 1165 Electroanalytical study of selenium(+IV) at a carbon paste electrode with electrolytic binder and electroactive compound incorporated

M.-A. De Paoli, R. C. D. Peres, S. Panero and B. Scrosati — 1173 Properties of electrochemically synthesized polymer electrodes—X. Study of polypyrrole/dodecylbenzene sulfonate

H. Tsutsumi, M. Yamamoto, M. Morita, Y. Matsuda, T. Nakamura and H. Asai — 1183 Novel single and double ion type siloxane polymeric solid electrolytes prepared by same prepolymers

J. M. Marioli and T. Kuwana — 1187 Electrochemical characterization of carbohydrate oxidation at copper electrodes

P. J. Sonneveld, W. Visscher and E. Barendrecht — 1199 Nucleation and growth of zinc on a glassy carbon electrode from a zincate solution

Y. Zhang and C. Cha — 1207 The primary film on the surface of a carbon electrode in $LiAlCl_4$–$SOCl_2$ electrolyte

Y. Zhang and C. Cha — 1211 Study of the surface film on lithium in $LiAlCl_4$–$SOCl_2$ electrolyte

A. Mills and H. L. Davies — 1217 Oxygen evolution redox catalysis using Ru-Adams

P. Novák — 1227 Limitations of polypyrrole synthesis in water and their causes

C. Hasiotis and G. Kokkinidis — 1231 Use of Pt/M(*upd*) (M = Pb, Tl, Bi) modified electrodes to the catalytic electroreduction of heterocyclic nitro compounds—II. 2-Nitro and 4-nitroimidazole

T. Radnai and C. Dorgai — 1239 An X-ray diffraction study of the structure of di- and trichromate ions in solutions used for electrochemical chromium deposition

L. Bencharif, A. Robert, A. Tallec and R. Tardivel — 1247 Electrochemical reduction of benzoyloxiranes: stereoselective electrosyntheses of aldols

B. Sun and M. Skyllas-Kazacos — 1253 Modification of graphite electrode materials for vanadium redox flow battery application—I. Thermal treatment

J.-C. Moutet, A. Ourari and A. Zouaoui — 1261 Electrocatalytic hydrogenation of azides using precious metal microparticles dispersed in polymer films

F. Beck, M. Dahlhaus and N. Zahedi — 1265 Anodic codeposition of polypyrrole and dispersed TiO_2

G. Saraivanov and M. Kaisheva 1273 Analytical model of differential capacity based on the isotherm of quasi-chemical approximation. Influence of the adsorption parameters

R. N. O'Brien and K. S. V. Santhanam 1279 Diffusion layer profiles in electrocatalysed reduction of Cu^{2+} at a Ti cathode

P. K. Wrona, A. Lasia, M. Lessard and H. Ménard 1283 Kinetics of the hydrogen evolution reaction on a rhodium electrode

Z. Ogumi, K. Inatomi, J. T. Hinatsu and Z. Takehara 1295 Application of the SPE method to organic electrochemistry—XIII. Oxidation of geraniol on Mn,Pt–Nafion

Short Communication

SPECIAL ISSUE

THIRD INTERNATIONAL SYMPOSIUM ON POLYMER ELECTROLYTES

GUEST EDITORS: M. ARMAND AND A. GANDINI

i ISE pages

M. Armand and A. Gandini — 1469 Editorial

Processing
G. P. Bierwagen — 1471 Film coating technologies and adhesion

I. M. Ward, J. E. McIntyre, G. R. Davies, S. A. Dobrowski, S. R. Mirrezaei and H. V. St. A. Hubbard — 1479 Ionic conduction in sequentially ordered thermotropic liquid-crystalline polymers

Z. Ogumi, Y. Uchimoto, E. Endo and Z. Takehara — 1483 Ionically conductive thin polymer films prepared by plasma polymerization—part 8. Vapor-phase preparation of Solid Polymer Electrolytes composed of plasma polymer and vapor-deposited lithium iodide complex

Physical and Electrochemical Characterization—Theory
A. Johansson, Å. Wendsjö and J. Tegenfeldt — 1487 NMR spectroscopy of PEO-based polymer electrolytes

W. H. Meyer, R. R. Rietz, D. Schaefer and F. Kremer — 1491 Dielectric and electric relaxation in Ionene-glasses

G. Petersen, P. Jacobsson and L. M. Torell — 1495 — A Raman study of ion–polymer and ion–ion interactions in low molecular weight polyether–$LiCF_3SO_3$ complexes

R. Frech and J. P. Manning — 1499 — Ionic association in poly(propylene oxide) complexed with alkali metal thiocyanate, perchlorate, and fluoroborate salts

R. Olender and A. Nitzan — 1505 — Ion solvation and association in complex solvents: theoretical considerations

K. Ichikawa and W. J. MacKnight — 1511 — Ionic conductivity mechanism of network polymers containing lithium perchlorate

N. Kobayashi, N. Kubo and R. Hirohashi — 1515 — Control of ionic conductivity in Solid Polymer Electrolyte by photoirradiation

P. G. Bruce, M. T. Hardgrave and C. A. Vincent — 1517 — *dc* polarization of polymer electrolytes

M. Watanabe, H. Nagasaka, K. Sanui, N. Ogata and R. W. Murray — 1521 — Ion/electron mixed conductors based on polymer electrolytes

P. G. Bruce, E. S. McGregor and C. A. Vincent — 1525 — The perfectly polarized polymer electrolyte/electrode interface

R. J. Latham, R. G. Linford, R. Pynenburg and W. S. Schlindwein — 1529 — EXAFS and related studies of mixed ion polymer electrolytes

S. Panero, B. Scrosati and S. G. Greenbaum — 1533 — Ionic conductivity and ^7Li NMR study of poly(ethylene glycol) complexed with lithium salts

New Polymer Electrolytes

J. M. G. Cowie, A. T. Anderson, M. Andrei, A. C. S. Martin and C. Roberts — 1539 — New polymer electrolyte systems

M. Andrei, J. M. G. Cowie and P. Prosperi — 1545 — Polymer electrolytes based on poly-phosphazene with pendant 12-crown-4 groups and monovalent salts

L. A. Dominey, V. R. Koch and T. J. Blakley — 1551 — Thermally stable lithium salts for polymer electrolytes

Z. Florjanczyk, E. Zygadlo-Monikowska, D. Raducha, K. Such and W. Wieczorek — 1555 — Polymeric electrolytes based on sulfur dioxide copolymers

L. Marchese, M. Andrei, A. Roggero, S. Passerini, P. Prosperi and B. Scrosati — 1559 — A new class of polymer electrolytes based on chain-extended polyepoxides and $LiClO_4$

W. Wieczorek, K. Such, Z. Florjanczyk and J. Przyluski — 1565 — Application of acrylic polymers in blend-based polymeric electrolytes

X. Peng, H. Ba, D. Chen and F. Wang — 1569 — Two-component epoxy network–$LiClO_4$ polymer electrolyte

P. Aranda, J. C. Galvan, B. Casal and E. Ruiz-Hitzky — 1573 — Ionic conductivity in layer silicates controlled by intercalation of macrocyclic and polymeric oxyethylene compounds

A. Vallée, S. Besner and J. Prud'homme — 1579 — Comparative study of poly(ethylene oxide) electrolytes made with $LiN(CF_3SO_2)_2$, $LiCF_3SO_3$ and $LiClO_4$: thermal properties and conductivity behaviour

J. F. Le Nest, S. Callens, A. Gandini and M. Armand — 1585 — A new polymer network for ionic conduction

G. Goulart, J.-Y. Sanchez and M. Armand — 1589 — Synthesis and electrochemical characterization of new polymer electrolytes based on dioxolane homo and co-polymers

M. Popall and H. Durand — 1593 — Inorganic–organic copolymers as solid state Li^+ electrolytes

S. Atchia, J.-P. Petit, J.-Y. Sanchez, M. Armand and D. Deroo — 1599 — Ionic conduction in $(PEO)_nKCu_xI_{1+x}$ complexes

V. De Zea Bermudez, M. Armand, C. Poinsignon, L. Abello and J. Y. Sanchez — 1603 — Proton-vacancy conducting polymers based on polyethylene oxide and sulfamide-type salts

C. R. Martin, L. S. Van Dyke and Zhihua Cai — 1611 — Template-synthesis—a method for enhancing the ionic and electronic conductivity in electronically conductive polymers

I. Gautier-Luneau, A. Denoyelle, J. Y. Sanchez and C. Poinsignon — 1615 — Organic–inorganic protonic polymer electrolytes as membrane for low-temperature fuel cell

D. Schoolmann, O. Trinquet and J.-C. Lassègues — 1619 — Properties and application of a proton conducting polymer: the $BPEI,xH_3PO_4$ system

J.-L. Paul, C. Jegat and J.-C. Lassègues — 1623 — Branched poly(ethyleneimine)–CF_3SO_3Li complexes

Applications

P. Baudry and A. Marquet — 1627 — Applications of solid state electrolyte generators for electric utilities

C. Arbizzani, M. Mastragostino, L. Meneghello, T. Hamaide and A. Guyot — 1631 — Poly *N*-(oxyalkyl)pyrrole electrodes and $(PEO–SEO)_{20}LiClO_4$ polymer electrolyte in lithium rechargeable batteries

T. A. Skotheim, X. Q. Yang, K. H. Xue, H. S. Lee, J. McBreen and F. Lu — 1635 — X-ray absorption studies on organo-disulfide redox cathodes

T. Gustafsson, J. O. Thomas, R. Koksbang and G. C. Farrington — 1639 — The polymer battery as an environment for *in situ* X-ray diffraction studies of solid-state electrochemical processes

B. Marsan and M. Malservisi — 1645 — Ionic conductivity studies of polymer electrolytes containing organosulfur species

H. Ohno — 1649 — Applications of polymer electrolytes: electrochromics, sensors and biology

M. A. B. Gomes, D. Gonçalves, E. C. Pereira de Souza, B. Valla, M. A. Aegerter and L. O. S. Bulhões — 1653 — Solid state electrochromic display based on polymer electrode–polymer electrolyte interface

Poster Session

R. R. Rietz, D. Schaefer, W. H. Meyer and H. W. Spiess — 1657 — Molecular dynamics in glassy polyelectrolytes: a NMR study

H. Cai, R. Hu, T. Egami, G. C. Farrington, W. S. Schlindwein, R. J. Latham, R. G. Linford and R. Pynenburg — 1663 — Local structure studies of PEO-based $NiBr_2$ electrolytes

B. V. R. Chowdari, R. Huq and G. C. Farrington — 1667 — Studies of plasticized-polymer electrolytes containing mixed Zn(II) and Li(I)

Huang Hong, Chen Liquan, Huang Xuejie and Xue Rongjian — 1671 — Studies on PAN-based lithium salt complex

D. Billaud, S. Lemont and R. Yazami — 1675 — Electrochemical intercalation of polyacetylene with alkali metals (lithium, sodium and potassium) in solid state cells

R. Huq, R. Koksbang, P. E. Tonder and G. C. Farrington — 1681 — Effect of plasticizers on the properties of new ambient temperature polymer electrolyte

W. Gorecki, E. Belorizky, C. Berthier, P. Donoso and M. Armand — 1685 — NMR investigation of $P(EO)(LiClO_4)_x$

Å. Wendsjö, J. Lindgren and C. Paluszkiewicz — 1689 — Structure, dynamics and morphology in the system $M(CF_3SO_3)_2\,PEO_n$ for M = Zn and Pb

M. S. Mendolia and G. C. Farrington — 1695 — Solvation of cobalt salts by oligomeric polyethers

S. Sylla, J.-Y. Sanchez and M. Armand — 1699 Electrochemical study of linear and crosslinked POE-based polymer electrolytes

S. Passerini, R. Pileggi and B. Scrosati — 1703 Laminated electrochromic devices: an emerging technology

J. Shi, P. G. Bruce and C. A. Vincent — 1707 A zinc trifluoromethane sulphonate polymer electrolyte

F. Bonino, S. Panero, P. Prosperi and B. Scrosati — 1711 Electrochemical properties of copper-based polymer electrolytes

W. J. Macklin, R. J. Neat and S. S. Sandhu — 1715 Structural changes in vanadium oxide-based cathodes during cycling in a lithium polymer electrolyte cell

S. Kohjiya, T. Horiuchi and S. Yamashita — 1721 Elastomeric ionic conductors from poly(ethylene oxide-co-epichlorohydrin)s

K. Motogami, M. Kono, S. Mori, M. Watanabe and N. Ogata — 1725 A new polymer electrolyte based on polyglycidylether

F. Alloin, J. Y. Sanchez and M. B. Armand — 1729 Conductivity measurements of LiTFSI triblock copolymers with a central POE sequence

J. Przyluski, W. Wieczorek and S. Glowinkowski — 1733 Novel proton polymer ionic conductors

D. Benrabah, J. Y. Sanchez and M. Armand — 1737 New polyamide–ether electrolytes

S. Atchia, W. Gorecki, M. Armand and D. Deroo — 1743 Ionic conduction in PEO–perfluorosulphonimide divalent salt complexes

1747 Papers in Press

1749 Electrochemical Calendar

NUMBER 10

i ISE pages

J. Torrent Burgués and F. Sanz Carrasco — 1753 Perchlorate adsorption parameters at the $Hg/HClO_4$ interphase and their use for the $Hg/HClO_4$, $(TEA)ClO_4$ interphase

J. Bobacka, M. Grzeszczuk and A. Ivaska — 1759 Electrochemical study of poly(3-octylthiophene) film electrodes. Impedance of the polymer film semiconductor–electrolyte interface

B. W. Mao, Z. Q. Tian and M. Fleischmann — 1767 Voltammetric studies of underpotential deposition of Tl from Tl(I) film confined to Ag electrodes

M. T. M. Koper — 1771 The theory of electrochemical instabilities

L. Makhloufi, S. Bourouina et S. Haddad — 1779 Cémentation de l'argent par le cuivre en milieu concentré de chlorures

S. C. Raj and M. Skyllas-Kazacos — 1787 Electrochemical studies of the effect of TiO_2 and B_2O_3 additions on the aluminium deposition reaction in the molten cryolite bath

T. Laitinen, K. Salmi, G. Sundholm, P. Viinikka and A. Yli-Pentti — 1797 The anodic behaviour of tin in sulphuric acid solutions

M. Calábek and K. Micka — 1805 On the resistance of the grid/active material interphase in lead–acid battery electrodes

I.-H. Yeo, Y. S. Lee and D. C. Johnson — 1811 Growth of lead dioxide on a gold electrode in the presence of foreign ions

L. D. Burke and J. K. Casey — 1817 The role of hydrous oxide species on platinum electrocatalysts in the methanol/air fuel cell

S.-C. Yang and P. Björnbom — 1831 Modeling and simulation of the operation of an AFC cathode by using concentrated electrolyte solution transport theory

S. Lj. Gojković, S. K. Zečević and D. M. Dražić	1845	Hydrogen peroxide oxidation on passive iron in alkaline solutions
T. Sotomura, H. Uemachi, K. Takeyama, K. Naoi and N. Oyama	1851	New organodisulfide–polyaniline composite cathode for secondary lithium battery
D. R. de Sena, E. R. Gonzalez and E. A. Ticianelli	1855	Effect of phosphoric acid concentration on the oxygen reduction and hydrogen oxidation reactions at a gas diffusion electrode
B. Wang and S. Dong	1859	Electrochemical study of isopoly- and heteropoly-oxometallate film modified microelectrodes—Part 2. Electrochemical behaviour of isopolymolybdic acid monolayer modified carbon fibre microelectrodes
T. Okajima, T. Ohsaka, O. Hatozaki and N. Oyama	1865	Electrode kinetics of $[Ru(NH_3)_6]^{3+/2+}$ couple confined in montmorillonite clay/poly(vinyl alcohol) composite films on graphite electrodes and film permeation of electroactive solution species
A. Cornell, G. Lindbergh and D. Simonsson	1873	The effect of addition of chromate on the hydrogen evolution reaction and on iron oxidation in hydroxide and chlorate solutions
E. Morallón, F. J. Cases, J. L. Vázquez and A. Aldaz	1883	Irreversible adsorption of methanol on Pt(110) in carbonate solution
A. R. Hillman and E. F. Mallen	1887	Electroactive bilayers employing conducting polymers—Part 4. Transient spectroelectrochemical studies of charge trapping
Short Communication Y. Gofer, Y. Ein Ely and D. Aurbach	1897	Surface chemistry of lithium in 1,3-dioxolane
	1901	Papers in Press

SPECIAL ISSUE

FIFTH INTERNATIONAL FISCHER SYMPOSIUM ON ADSORBATES, INTERMEDIATES AND INHIBITORS

GUEST EDITOR: W. J. LORENZ

	i	ISE pages
W. J. LORENZ	2113	Editorial
Plenary Lectures		
W. PLIETH	2115	Additives in the electrocrystallization process
A. M. KUZNETSOV	2123	Theoretical aspects of charge transfer reactions at normal and superconducting electrodes
I. ENGELHARDT, R. SPECK, J. INCHE, H. S. KHALIL, M. EBERT, W. J. LORENZ, G. SAEMANN-ISCHENKO and M. W. BREITER	2129	Low temperature electrochemistry on high T_c superconductors
S. TRASATTI	2137	Adsorption of organic substances at electrodes: recent advances
P. GU, L. BAI, L. GAO, R. BROUSSEAU and B. E. CONWAY	2145	Problems in the determination of adsorption behaviour of intermediates in Faradaic reactions: distinction between double layer and adsorption capacitance of electrocatalysts determined from fast potential relaxation transients
A. J. ARVIA, R. C. SALVAREZZA and J. M. VARA	2155	Dynamics of roughness and surface reactions at solid electrodes
K. M. ROBINSON, I. K. ROBINSON and W. E. O'GRADY	2169	Electrochemically induced surface roughness on Au(100) studied by surface X-ray diffraction
W. J. LORENZ, L. M. GASSA, U. SCHMIDT, W. OBRETENOV, G. STAIKOV, V. BOSTANOV and E. BUDEVSKI	2173	STM studies in underpotential–overpotential metal deposition
F. C. NART and T. IWASITA	2179	Second order Stark effect of adsorbed sulfate ions on polycrystalline platinum
B. LITTLE, P. WAGNER and F. MANSFELD	2185	An overview of microbiologically influenced corrosion
A. JARDY, A. LEGAL LASALLE-MOLIN, M. KEDDAM and H. TAKENOUTI	2195	Copper dissolution in acidic sulphate media studied by QCM and *rrde* under *ac* signal
Electrocrystallization		
M. E. MARTINS, R. C. SALVAREZZA and A. J. ARVIA	2203	Early stages of copper electrodeposition on columnar structured platinum electrodes
P. HERRASTI, P. OCÓN, R. C. SALVAREZZA, J. M. VARA, L. VÁZQUEZ and A. J. ARVIA	2209	A comparative study of electrodeposited and vapour deposited gold films: fractal surface characterization through scanning tunnelling microscopy
A. HERNÁNDEZ CREUS, P. CARRO, S. GONZÁLEZ, R. C. SALVAREZZA and A. J. ARVIA	2215	Electrochemical kinetics and growth modes of silver deposits on polyfaceted platinum spherical electrodes

A. MILCHEV 2229 Electrochemical growth of spherical clusters under joint ohmic, diffusion and ion transfer limitations—II

E. MICHAILOVA and A. MILCHEV 2233 Electrochemical growth of spherical clusters under joint ohmic, diffusion and ion transfer limitations—III

H. J. PAULING and K. JÜTTNER 2237 Top-on-top monolayer formation of foreign metals on gold single crystal surfaces

W. VISSCHER and A. P. COX 2245 Ellipsometry of metal deposition

L. MURESAN, L. ONICIU, M. FROMENT and G. MAURIN 2249 Inhibition of lead electrocrystallization by organic additives

K. BADE, V. TSAKOVA and J. W. SCHULTZE 2255 Nucleation, growth and branching of polyaniline from microelectrode experiments

Corrosion

W. BRANDL 2263 Practicability of electrochemical measurements in microareas

B. ELSENER and A. ROSSI 2269 XPS investigation of passive films on amorphous Fe–Cr alloys

F. MANSFELD, Y. WANG and H. SHIH 2277 The Ce–Mo process for the development of a stainless aluminum

J. B. BESSONE, D. R. SALINAS, C. E. MAYER, M. EBERT and W. J. LORENZ 2283 An EIS study of aluminium barrier-type oxide films formed in different media

F. MANSFELD and B. LITTLE 2291 Microbiologically influenced corrosion of copper-based materials exposed to natural seawater

M. BEIER and J. W. SCHULTZE 2299 Kinetic investigations of layer formation by inhibitors with Cu/AHT as example

J. TITZ, G. H. WAGNER and W. J. LORENZ 2309 *In situ* EIS studies of localized corrosion processes in research and industrial practice

Spectroscopy

B. W. JOHNSON, J. BAUHOFER, K. DOBLHOFER and B. PETTINGER 2321 Practical considerations of the *ir* attenuated-total-reflection (*ir*-ATR) technique for electrochemical investigations

B. WICHMAN, J. P. VAN DER EERDEN, H. MEEKES and J. GERRITSEN 2331 STM observation of the mobility of Ag(100) surfaces and polycrystalline Pd surfaces: atmospheric and aqueous conditions

M. JANIK-CZACHOR and J. JASNY 2347 A SERS investigation of adsorption of $Fe(bpy)_3^{2+}$ complex on silver

B. SAVOVA-STOYNOV and Z. B. STOYNOV 2353 Four-dimensional estimation of the instantaneous impedance

Z. B. STOYNOV 2357 Rotating Fourier transform—new mathematical basis for non-stationary impedance analysis

T. IWASITA, F. C. NART, B. LOPEZ and W. VIELSTICH 2361 On the study of adsorbed species at platinum from methanol, formic acid and reduced carbon dioxide *via in situ* FT-*ir* spectroscopy

Adsorption

A. POPOV, R. NANEVA, N. DIMITROV, T. VITANOV, V. BOSTANOV and R. DE LEVIE 2369 Two-dimensional condensation of thymine on a basal face of a cadmium single crystal

A. Popov, N. Dimitrov and T. Vitanov — 2373 Adsorption of thymine on the (111) face of a silver single crystal

C. Cachet, M. Keddam, V. Mariotte and R. Wiart — 2377 Adsorption of perfluorinated surfactants on gold electrodes—I. Comparison of non-ionic compounds

G. Sandstede — 2385 Award of the Hellmuth Fischer Medal to Dr K.-M. Jüttner

2387 Papers in Press

2391 Electrochemical Calendar

NUMBER 13

i ISE pages

G. Wittstock and H. Emons — 2395 Determination of surfactant coverage of electrodes—a simple and efficient approach

N. Kaneko, N. Shinohara and H. Nezu — 2403 Effects of aromatic carbonyl compounds on the surface morphology and crystal orientation of electrodeposited tin from acid stannous sulfate solutions

K. L. N. Phani and S. Pitchumani — 2411 Electrochemical characterization of Fe(III) NaY prepared from acetonitrile–Fe^{3+} ion exchange medium as an electrode modifier

M. Bojinov, I. Kanazirski and A. Girginov — 2415 Impedance measurements of the relaxation phenomena in the bismuth/anodic film/electrolyte system

H. Konno, M. Tokita, A. Furusaki and R. Furuichi — 2421 Electrochemical formation of A-site substituted perovskite structure $La_{1-x}M_xCrO_3$ oxide coatings

N. Tateishi, K. Yahikozawa, K. Nishimura and Y. Takasu — 2427 Hydrogen electrode reaction on electrodes of glassy carbon-supported ultrafine Pd particles in alkaline media

A. Robin and J. de Lépinay — 2433 Electrochemical study of the anodic dissolution of iron and nickel in the molten LiF–NaF–KF eutectic at 600°C using convolutional voltammetry

Su-Il Pyun and Moon-Hee Hong — 2437 The repassivation kinetics of pure nickel in a Na_2SO_4 solution using abrading electrode technique

G. Horányi — 2443 Radiotracer study of the adsorption of C-14 labelled D-glucose at a platinized platinum electrode in acid medium

N. Papadopoulos — 2447 Three-dimensional phase sensitive *ac* voltammetric study of the film development of phosphonium cations at a stationary mercury electrode

G. Paasch, K. Micka, M. Schwarzenberg, K. Jobst and L. Sawtschenko — 2453 Studies on thermally structurized polyacrylonitrile by the electrochemical impedance method

B. Sun and M. Skyllas-Kazacos — 2459 Chemical modification of graphite electrode materials for vanadium redox flow battery application—part II. Acid treatments

G. Mabon and J. Simonet — 2467 An efficient and specific cathodic Z → E isomerization for some Z 1,2-diarylsulfonyl phenyl ethylenes

M. Datta, L. F. Vega, L. T. Romankiw and P. Duby — 2469 Mass transport effects during electropolishing of iron in phosphoric–sulfuric acids

L. T. Kubota and Y. Gushikem — 2477 Cyclic voltammetric study of $[Fe(CN)_6]^{3-/4-}$ immobilized on silica gel surface coated with titanium(IV) oxide

J. Volke, J. Urban and V. Volkeová — 2481 The influence of substitution on the reduction mechanism and stability of reduction intermediates in 1,1′-phenylene-, 1,1′-diphenylene- and 1,1′-polymethylene-bispyridinium dications

F. A. Adekola, M. Diaw, C. Colin and D. Bauer — 2491 Electrochemical study of some palladium compounds at a carbon paste electrode—application to the determination of palladium in oxidation automotive catalysts

CHI-CHUNG LAI and YOUNG KU	2497	The mass transfer and kinetic behavior of chelated copper solution: effect of species distribution
B. R. SCHARIFKER, J. MOSTANY and A. SERRUYA	2503	On the spatial distribution of nuclei on electrode surfaces
L. A. DE FARÍA, J. F. C. BOODTS and S. TRASATTI	2511	Physico-chemical and electrochemical characterization of Ru-based ternary oxides containing Ti and Ce
J. LOZAR, L. SCHUFFENECKER et J. MOLINIER	2519	Determination des proprietés électrochimiques et thermodynamiques de Pb^{2+}, $PbCl^{+}$ et $PbCl_2$ à partir de mesures de conductivité de solutions aqueuses de chlorure de plomb à 25°C
J. KUPIS, H. SCHOLL and O. VITTORI	2523	Anodic polarization of the [(Ta, Nb)C, M; M = Fe, Ni or Co] electrodes in 0.5 M sulphuric acid solution
A. DAMJANOVIC	2533	Electron transfer through thin anodic films in oxygen evolution at Pt electrodes in alkaline solutions
I. T. E. FONSECA, A. C. S. MARIN and A. C. SÁ	2541	The effect of SO_4^{2-} on the electrochemical behaviour of Cu in neutral medium
Short Communications		
K. OTSUKA, K. ISHIZUKA and I. YAMANAKA	2549	Synthesis of cresols by applying H_2–O_2 fuel cell reaction
	2553	Papers in Press
	2555	Electrochemical Calendar

NUMBER 14

	i	ISE pages
S. A. S. MACHADO, A. A. TANAKA and E. R. GONZALEZ	2559	Underpotential deposition of cadmium on polycrystalline platinum and its influence in the oxygen reduction reaction
M. A. MARTÍNEZ, J. HERRERO and M. T. GUTIÉRREZ	2565	Electrochemical stability of indium tin oxide thin films
P. HEIDUSCHKA and J. DITTRICH	2573	Impedance spectroscopy and cyclic voltammetry at bare and polymer coated glassy carbon electrodes
N. BOUCHER and R. CARPENTIER	2581	Generation of photocurrents by a chloroplast photosystem I submembrane fraction using the Mehler reaction
S. DONG and G. CHE	2587	The application of an ultramicroelectrode in homogeneous catalytic reaction—part I. General characteristic of a homogeneous catalytic reaction at an ultramicroelectrode with arbitrary geometry under steady state
D.-W. PANG, Z.-L. WANG and C.-S. CHA	2591	Electrocatalysis of metalloporphyrins—part 11. Catalytic electroreduction of dithiodipropionic acid with water-soluble cobalt tetrakis(4-trimethylammoniumphenyl) porphyrin catalyst
J. HLAVATÝ and P. NOVÁK	2595	The influence of H^+ ions liberated by electropolymerization on the decomposition of propylene carbonate
L. BAUMANE, J. STRADINS, R. GAVARS and G. DUBURS	2599	Mechanism and products of electrochemical reduction of 4-(nitrophenyl) substituted 1,4-dihydropyridines
E. JUZELIŪNAS and M. SAMULIAVIČIENĖ	2611	Investigation of cadmium oxygen corrosion in acid sulphate solutions
R. T. CARLIN, P. C. TRUELOVE and R. A. OSTERYOUNG	2615	Electrochemical and spectroscopic study of anthracene in a mixed Lewis–Brønsted acid ambient temperature molten salt system
M. P. SUMINO and S. SHIBATA	2629	Specific adsorption of hydrogen on polycrystalline platinum electrode
Z. H. GU, J. CHEN and T. Z. FAHIDY	2637	The oscillatory behaviour of anodic copper dissolution into a NaCl/KSCN electrolyte
K.-Y. WONG, V. W.-W. YAM and W. W.-S. LEE	2645	Electrocatalytic oxidation of benzyl alcohol with a monooxoruthenium(V) complex in solution and inside Nafion films

I. Becerik and F. Kadirgan 2651 The electrocatalytic properties of palladium electrodes for the oxidation of D-glucose in alkaline medium

J. C. S. Fernandes and M. G. S. Ferreira 2659 Effect of carbonate and lithium ions on the corrosion performance of pure aluminium

Th. Wandlowski, M. Heyrovsky and L. Novotny 2663 Interfacial properties of uracil films adsorbed at the mercury/electrolyte interface

Book Reviews
R. Holze 2673 *Chemische Sensoren* by F. Oehme and *Ionenselektive Elektroden* by F. Honold and B. Honold

AIMS AND SCOPE

This international journal is intended for the rapid publication of both original work and reviews in the field of electrochemistry. Electrochemistry should be interpreted to mean any of the Divisions of the International Society of Electrochemistry, *ie*

(1) Fundamental Interfacial Electrochemistry
(2) Electrode and Electrolyte Materials
(3) Analytical Electrochemistry
(4) Molecular Electrochemistry
(5) Electrochemical Energy Conversion
(6) Corrosion, Electrodeposition and Surface Treatment
(7) Industrial Electrochemistry and Electrochemical Engineering
(8) Bioelectrochemistry.

GUIDE TO AUTHORS

Papers should be submitted directly to the Editor-in-Chief, except that authors from North America *may* instead send their papers to the North American Regional Editor: E. J. Cairns, Energy & Environment Div. Bldg 90, Lawrence Berkeley Laboratory, University of California, Berkeley, CA 94720, U.S.A.

1. Papers submitted to *Electrochimica Acta* should consist of (i) critical reviews, (ii) full length research papers or (iii) short communications, *not previously published*, in the field of pure and applied electrochemistry. Authors intending to offer critical reviews are advised first to contact the Editor-in-Chief. Short communications should take up no more than *two* printed pages in the journal and will be handled more rapidly if supplied in camera-ready format, in which case papers may be up to *four* pages long. Papers that are accepted may not be published elsewhere in any language without the consent of the Editor-in-Chief. Papers from non-members of Int. Soc. of Electrochemistry are welcome.

2. Papers will only be published if they are likely to be of interest to our subscribers. Thus papers which deal solely with the *dc* polarography of substances will probably not be accepted, whilst papers dealing with conductance or *emf* measurements on ambient temperature electrolytes should generally be submitted in the form of Short Communications. All papers will be refereed.

3. **Only English language papers will be accepted.** An abstract not exceeding 200 words must be provided. For Short Communications an abstract not exceeding 50 words should be provided. Authors must provide **FIVE KEY WORDS** at the end of each abstract.

4. Papers should be submitted **IN TRIPLICATE** to facilitate refereeing. Where there may be postal delays authors are advised to send an additional copy to Newcastle by fax at the same time that they post their three copies. **One top copy** and **two** Xerox copies are acceptable. They should be typed in **double spacing on one side of the paper only.** Detailed descriptions of apparatus etc. should be given only if such apparatus is new.

5. The author responsible for proofs and correspondence must be identified on the manuscript. Failure to do this can be a major cause of delay in publication. **ONCE A MANUSCRIPT HAS BEEN ACCEPTED, QUERIES REGARDING THE PROGRESS OF PUBLICATION SHOULD BE ADDRESSED TO THE PRODUCTION EDITOR** at Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K. In the interests of speedy publication galley proofs are not submitted to authors. The difficulty and expense involved in making corrections to page proofs make it essential for authors to prepare their manuscripts carefully so that alteration is not required. The cost of excessive alteration at the proof stage may have to be charged to the author.

6. Illustrations should be on separate sheets the same size as the typescript, in any case no larger than A4 (209 by 296 mm). **Legends for illustrations should also be on a separate sheet;** they should render the illustration intelligible without reference to the text. **ONE SET OF ORIGINAL LINE DRAWINGS** and two sets of photocopies should be furnished, drawn boldly to twice the final size required, with lettering in light pencil. The following standard symbols easily available to the printer for legends should be used:

○ ● + × □ ■ △ ▲ ◇ ◆ ▽ ▼

Photographs and photomicrographs should be included only if absolutely *essential*. If artwork needs to be redrawn this may cause a delay.

7. Tables should be kept to a minimum; no data can be recorded in both graphical and tabular form. Essential tables should be provided with headings, and should be intelligible without reference to the text. In the interest of economy and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the authors' manuscripts.

8. Authors are requested to provide **FIVE KEY WORDS** for future indexing.

9. References should be indicated in the text in square brackets, and listed at the end of the paper as follows:

1. K. F. Bonhoeffer and H. Gerischer, *Z. Elektrochem.* **52,** 149 (1948).
2. U. R. Evans, *Metallic Corrosion, Passivity and Protection*, 2nd edn, p. 32. Arnold, London (1964).

Abbreviations of journal titles should follow those in *World List of Scientific Periodicals* (Fourth Edition).

10. Each paper should be consistent within itself as to abbreviations, symbols and units. Authors should use wherever possible SI units and when these are not used should provide a conversion factor to SI units. Axes for graphs and headings for tables should be given in quantity calculus form, e.g. times as t/s, potential as E/mV, current density as i/A m^{-2}. Any electrochemical abbreviations should be written without stops, e.g. *emf*, *pd*, *ac*, etc.

11. Reprints can be ordered on the form accompanying proofs.

12. If the above recommendations are followed, it will be possible to publish accepted papers with a minimum of delay. **Papers not conforming to this Guide will, however, inevitably suffer much delay and in extreme cases may have to be rejected entirely.** The Editors will warmly appreciate the co-operation of authors in preparing papers in a manner that will facilitate the complex work of publication.

13. The original manuscript and diagrams will be discarded 1 month after publication unless the Publisher is requested to return original material to the author.

14. Material for the Calendar should be sent to the Editor-in-Chief: Dr R. D. Armstrong, Chemistry Department, The University, Newcastle upon Tyne NE1 7RU, England. **Organizers are asked to submit details at least 6 months before the date of the event.**
